

## PRODUCT NAME

**NON-WOVEN GEOTEXTILE POLYESTER (150GSM)**  
 -Mechanically bonded and needle punched

## DESCRIPTION

Geotextile made from staple fibres that are mechanically bonded by a needle punching process to produce a dimensionally stable network. The fibres used are 100% virgin white Polypropylene, ultra-violet resistant with 165°C melting point.

## APPLICATIONS

- Geotextiles are used in road and railway soil stabilization, waterways and seashore erosion control, asphalt pavement overlay crack relief, subsurface drainage systems, waterproofing membrane protection, landfill, landscaping etc.
- Separation between two dissimilar materials so that the integrity and functioning of both materials can remain intact or be improved.
- Filtration by permitting water flow across the plane of the geotextile while retaining fine soil particles.
- Transmission by providing water drainage and gas venting within the plane of the geotextile.
- Sealing when impregnated with asphalt or resin to act as a moisture barrier.
- Stress Absorption in pavement overlay when impregnated with asphalt.
- Protection of geo-membrane against puncture by absorbing the point stresses.

## SPECIFICATIONS

| PROPERTY                 | VALUE     |
|--------------------------|-----------|
| Density                  | 150GSM    |
| Thickness                | 1.5MM     |
| Tensile Strength MD      | 9KN/M     |
| Tensile Strength CD      | 12KN/M    |
| Tensile Elongation       | 50% IN    |
| Static Puncture Strength | 1000N     |
| AOS [O <sub>95</sub> ]   | 125MICRON |
| Melting Temperature      | 230°C     |
